GOING GREEN! - GLOBAL WARMING

Climate change is the most serious, long-term threat our planet is facing. Scientists agree that Earth getting warmer is creating extreme weather conditions. Human activity is causing temperatures rise faster than they might otherwise. Being too wasteful with the planet's resources is why this is happening. It is up to us to act – to take responsibility for the planet's future.

Take a look at the way you and your family live, and make changes that will ensure your household is "greener" and more friendly to the environment.

Did you know?
According to a study by scientists, climate change (global warming) is threatening polar bears with starvation.
